

**A.C.P.O. Vehicle Crime Intelligence Service (A.V.C.I.S.) and the International Association of Auto Theft Investigators (UK Branch) (I.A.A.T.I.)**

**2014 Joint National Vehicle Crime Conference**

**Henry Ford College, Loughborough University, Leicestershire**

**24th & 25th, September 2014**

**A.V.C.I.S. and I.A.A.T.I. are holding a joint Vehicle Crime Conference.**

The poster features a red header with 'National Vehicle Crime Conference 2014'. Below this, it lists the venue 'Henry Ford College Loughborough University' and dates '24th and 25th September 2014'. Logos for Ford, AVCIS (ACPO Vehicle Crime Intelligence Service), and IAATI are included. The website 'www.avcis.police.uk' is at the top right, and 'www.iaati.org.uk' is at the bottom right. The slogan 'Disabling The Vehicle Enabled Criminal' is at the bottom left.

A.V.C.I.S. is a strategic player in the vehicle crime arena and works with law enforcement agencies and industry tackling organised vehicle crime. A.V.C.I.S. gathers and disseminates intelligence, shares best practice and support investigations.

I.A.A.T.I. partners with trusted organisations who are service providers in products, intelligence, opinion formers and a healthy cross section of key players from the motorcycle, road haulage, leisure, plant, and the insurance and motor industry as a whole.

Police and Government Agencies, Industry experts and staff will complement the wide mix of delegates, all providing a clearer focus on a multi layered response to this form of criminality.

This event is to be held at the Henry Ford College, Loughborough University, under the banner – 'Disabling The Vehicle Enabled Criminal'.

**INTRODUCING OUR 2014 CONFERENCE GOLD SPONSORS:-**

Founded over 30 years ago, **Retainagroup** is recognised as the world's number one provider of vehicle identification solutions. Using continually advancing technology, the company's product range will robustly mark and identify vehicle windows and a large range of component parts. All markings are eye-readable, resistant to attack and, where an overt label is used, the mark is clearly readable under UV light even if the label is removed.

Fully recognised and accredited by Thatcham, the **Retainagroup** system allows police vehicle examiners, roads police, beat officers and purchasers of second hand vehicles to immediately check whether a vehicle has been stolen or cloned. Any component part that has been marked and registered can also be quickly verified by calling the company's International Security Register (ISR), 24/7, where every allocated identification code is securely linked to the vehicle's VIN. A dedicated Police portal is also available through which additional vehicle details can be checked.

**Retainagroup** was the first company to support marking products with a secure database providing a fully manned 24/7 service, 365 days a year.

The ISR has always and continues to be, operated according to the strictest of security protocols and it is fully accredited to Standards recognised by the industry and law enforcement. It has been proven that Retainagroup marked and registered vehicles are 50% less likely to be stolen in the first place and 55% more likely to be recovered, should they be stolen. Furthermore, the ISR is entrusted with the key codes for a number of manufacturers and these are only made available to approved applicants according to protocols approved by Thatcham.

The **Retainagroup** system deters and detects crime, providing a major challenge to criminals. Beneficiaries of the system include vehicle owners, vehicle manufacturers/importers, insurers and finance houses as well as police and law enforcement agency.

**Trade Vehicle Locks Ltd** [TVL] is the UK's Premier Supplier of designer vehicle security products. Based in Grays, Essex, with 40 years in the industry, TVL also has a nationwide network of fitters and provides world leading vehicle security products and is the UK specialist for commercial vehicle security. TVL boasts a combined experience of more than 40 years designing, building and installing advanced locking systems for vans and goods vehicles.

**Trade Vehicle Locks** pride itself on supplying the largest and most bespoke range of commercial vehicle security products available, giving our customers the choice of products to satisfy their customers needs. Most products available on the market today have originated from TVL in one shape or form. Our R&D department is the most proactive of any supplier in our industry, allowing our product portfolio to constantly expand. We are able to design, build and quickly bring to market countermeasures for the latest vehicle specific criminal methods employed by thieves.

We believe knowledge is key and as such we offer Installation and Product training courses where we will be showing first hand the benefits of each products and application, giving you the confidence to properly advise your customers on the best products and applications to suit their needs. Technical support is offered by experienced installers and engineers. You can have peace of mind that the person answering the phone knows what they are talking about and will provide you with the very best advice to assist you if required.
